- The scale of underreporting has gone down as far as annual data is concerned. However, it warrants the need of some sorts of integration of Budgeting Information System with the monitoring system of IMED and ERD. In FY02/03, CGA development expenditure is higher than IMED ADP expenditures as Development Expenditure is greater than the ADP by the amount of Non-ADP FFW + Non-ADP Projects- Self-financing.

### c.2 Development Expenditure: Growth and Allocation Pattern

Table c.2 presents sector-wise growth and allocation pattern of Development Expenditure. It shows:

- ❖ While Revised Budget (RB03) for the FY03 was 10.2% less than the original budget (B03) and A03 was 7.6% less than RB03, B04 was 18.0% higher than RB03.

- On annual basis, the discrepancy between NBR and CGA system has reduced to a great extent.
- On monthly basis as well as on cumulative basis, the gaps still exist and indicate the need for quick reporting and accumulation of data in CGA system with increased coordination with NBR.

Table d.2 (presented in the next page) indicates that:

- While tax revenue collection estimates for the FY04, is 16.5% higher than RB03 of the FY03, it is 19.8% higher than the actual collection (A03).
- Up to December, FY04, tax revenue collection for the FY04 registers 2.3% increase over the corresponding period of the previous FY03. Whereas, Non-NBR tax collection increased by 21.2%. and Non-tax revenue collection by 17.6%.
- Up to December, FY04 only 38.5% of the Budgeted Revenue have been collected.

- Too much dependence on indirect taxes (only 13% from income tax, about 20% from all direct taxes including income tax)
- Biased towards external sector (about 40%) and susceptible to external shocks.

Data generated under the Budgeting Information System still underreports development expenditure and it seems there is some time lag between actual expenditure and imputing the same in the System. This seems to be true both for Revenue expenditure and Development expenditure.

The major problematic areas are:

- Regarding expenditures even up to December, FY04, only 8 (Eight) ministries/divisions show an utilization of revenue resources higher than 50%: President Office (52.2%), Establishment (51.3%), Public Service Commission (54.2%), IMED (51.6%), Energy (60.0%), Environment (57.7%), Civil Aviation (58.1%) and Supreme Court (50.8%). In some cases, there are some programmed expenditure which has not yet been carried out (e.g. CHT) and in others, there may be underreporting or lag in reporting of expenditure again with regard to programmed expenditure involving food within other ministries/divisions.
- Overall development expenditure remains unreported. There is also a probability that development expenditure remains under-utilized up to the first half of the year resulting misutilization at the end of the FY. This needs to be addressed.

Data regarding 'Foreign Loan and Grants' may still remain underreported. This year's prospect of Foreign aid flow is also expected to fall short of the budget estimate as evident from the table shown below.

## f. Budget Financing

Table e.1 in the previous page presents the budget deficit position. The table presented below indicates sources of financing the deficit and their shares. Following Values of major policy variables emerge from the above-mentioned two tables:
